SUMMARY

Healthcare operations professional with 10+ years of customer-facing experience, moving into IT support while completing a B.S. in Computer Science. HIPAA-trained; CompTIA A+ Core 1 passed. Runs a Linux/Docker homelab and published a Python game engine to Google Play.

TECHNICAL SKILLS

Hands-on in my homelab unless noted.

Operating systems: Windows 10/11, Linux, macOS

Networking: DNS (Pi-hole), VPN (Tailscale), firewall (UFW), reverse proxy (Nginx Proxy Manager), TLS certificates, Cloudflare Tunnel

Systems and identity: Active Directory (lab), Authentik SSO/MFA

Scripting and tools: Python, Bash, Git/GitHub, Docker Compose, systemd

Workplace tools: EPIC, Microsoft 365 (Outlook, Teams, SharePoint), remote desktop, HIPAA/PHI

EDUCATION AND CERTIFICATIONS

B.S. in Computer Science | Metropolitan State University of Denver | Expected May 2028

CompTIA A+ | Core 1 passed (2026); Core 2 pending

Cisco Networking Academy | Network Technician career path (7 courses and exam), Feb-Mar 2025

Networking Basics, Hardware Basics, OS Basics, Linux Unhatched, Devices and Initial Configuration, Addressing and Troubleshooting, Support and Security | Introduction to Linux

PROJECTS

Self-hosted homelab | Jan 2025 - present

- Run 10+ containerized services (Pi-hole DNS, Nginx Proxy Manager, Authentik SSO/MFA, Uptime Kuma, Duplicati backups) behind a Tailscale VPN and default-deny firewall; each deployment is documented in runbooks and personal tickets.
- Built a Windows Server Active Directory lab: domain controller, OUs, security groups, Group Policy.

DieNamic Engine | Apr 2025 - present

- Designed and built a Python/Kivy game engine hosting six titles; published to Google Play (Dec 2025).
- Wrote automated smoke-test tooling and a self-hosted Flask leaderboard API behind a Cloudflare Tunnel.

EXPERIENCE

Medical Biller (with IT support duties) | MedStuff, CO | May 2025 - Mar 2026

- Handled IT tickets for a small office (printers, phones, internet access), set up 5 new workstations with employee credentials, and helped teardown, relocate and reestablish workstations during an office reset.
- Sole biller for three product lines (enteral nutrition, durable medical equipment, diabetic resupply): 100+ recurring accounts billed monthly to quarterly, plus follow-up on unpaid claims.
- Posted EOB/ERA remittances and resolved claim denials through daily, weekly, and monthly account reviews.
- Kept billing running through the Bonafide-to-Atlas system migration.

Medical Equipment Coordinator | Children's Hospital Colorado, Aurora, CO | Aug 2022 - Oct 2024

- Taught 25+ patient families per month to use up to five types of home respiratory equipment.
- Implemented a pre-discharge insurance qualification check for life-sustaining equipment orders, ensuring DME partners were paid for services rendered.
- Trained a new DME coordinator on EPIC and department procedures; coordinated DME orders and authorizations with providers, vendors, and payers.

Apria Healthcare | Littleton, CO | May 2014 - Aug 2022

Promoted through four roles: Customer Service (2014-16), Eligibility and Qualifications (2016-18), Kaiser Lead (2018-20), Patient Resolution Liaison (2020-22)

- Handled 30-90 Kaiser Permanente issues and complaints per month: traced each to its root cause, escalated to branch managers, and tracked every case to a written reply and corrective follow-up with the affected patient/s.
- Presented findings monthly to Kaiser Permanente management; resolved billing, eligibility, denial, and prior-authorization issues across Medicare, Medicaid, CHP+, and CICP.
